The Garden Collection

Faced with the absence of seats and chairs for the garden in the XVIIIth century, Massant conceives today a garden collection that could have existed in the XVIIIth century...

Creation and not reproduction...

Contrary to the interior collection of MASSANT which consists exclusively of reproductions, all the models in the Garden Collection are creations.

Loyal however, to the proportions and spirit of that era.

When interior refinement and elegance is continued in the exterior...

Cabriolets, chairs and seats are treated in the same way as the seats of the interior collection of MASSANT. The wood is sculpted, shaped and decorated.

The seats can be foreseen of cushions...

To summarize, the Garden Collection of MASSANT, is at the same time refined, elegant, unexpected and definitely innovative, perfectly in balance with the proportions of the era and the requirements of modern comfort... A dream has come true.

La collection Jardin

Face à l'absence de sièges et fauteuils de Jardin au XVIIIème, MASSANT conçoit aujourd'hui, une collection de jardin qui aurait pu exister au XVIIIème siècle...

Création et non réédition...

Contrairement à la collection intérieure de MASSANT composée exclusivement de rééditions, tous les modèles de la Collection de Jardin sont des créations. Fidèles toutefois, aux proportions et à l'esprit de l'époque.

Quand le raffinement et l'élégance de l'intérieur s'invitent à l'extérieur...

Cabriolets, chaises, fauteuils ont tous été travaillés comme les sièges de la collection intérieure de MASSANT. Les bois sont sculptés, moulurés, décorés. Les assises sont agrémentées de coussins, de galettes ou de châssis.

Il est pour le moins surprenant de voir un Fauteuil Louis XV "dormir" à la belle étoile...

En somme, la Collection OUTDOOR de MASSANT, à la fois raffinée, élégante, inattendue et définitivement novatrice, est un parfait équilibre entre les proportions du XVIIIème et les exigences de confort actuel...

un rêve qui s'est réalisé.

The leader in quality
and innovation,
decade after decade.

For over 50 years, Sunbrella has been the leader in performance fabrics. And there's good reason people look to Sunbrella first for their fabric needs. No one else brings so much under one revolutionary, stylish brand.

No other resource is more committed to leading the performance fabric industry with innovations that fit today's lifestyles. With enhanced quality, additional colours and sophisticated styles, the next generation of Sunbrella offers more possibilities than ever.

Sunbrella fabrics are durable.

Sunbrella superior pigments are added during the production of fade-resistant Sunbrella fibre. The final result is Sunbrella yarn and fabric with colour throughout that won't fade or wash away. Think «carrot».

In ordinary fabrics, dyes are added to the surface of the yarn or fabric. The colour only penetrates the outer layer and washes out or fades away over time. Think «radish»

Sunbrella fabrics are easy to clean.

Sunbrella fabrics are amazingly easy to maintain, and most spills can be cleaned with mild soap and water. For tough stains, bleach can be used without fear of damaging the fabric or removing the color.

The best way to keep Sunbrella fabrics looking good is to properly maintain them by brushing off dirt before it becomes embedded and wiping up spills as soon as they occur.

Additionally, a topical finish is applied to all Sunbrella fabrics to help them repel liquids making it even easier to maintain.

Sunbrella fabrics protect you from the elements.

The Skin Cancer foundation recommends Sunbrella as a part of your complete sun protection regime, including regular use of sunscreen.

* Does not apply to styles of Sunbrella that are designed for transparency, such as Sunbrella Velum

In harmony
with the environment.

Sunbrella creates no wastewater from dyeing. Sunbrella® fabric's unique colouring process avoids harmful effluents associated with conventional dyeing processes. It also dramatically reduces water and energy consumption.

Sunbrella finishing processes consume less water. Continual improvement in the Sunbrella finishing application process at the Wasquehal, France plant allows us to use the same water several times for successive operations, as well as to recycle most of our wastewater. Heat from our wastewater is also recuperated to warm our clean water.

Sunbrella fabrics are extremely durable. Sunbrella fabrics are engineered to last two to ten times longer than conventional fabrics. Thanks to their extended lifecycle, the long term environmental impact of Sunbrella fabrics is considerably less than that of cotton canvas, for example.

Sunbrella fabrics are safe for
people and nature.

Sunbrella fabrics have been tested according to Oeko-Tex 100: this label certifies that they contain no harmful substances, and present no hazards to health, skin or the environment.

Sunbrella fabrics are Greenguard
Indoor Air Quality Certified.

The Greenguard designation ensures that Sunbrella fabrics are a low-emitting product and can be used indoors or in any application where enhanced air quality is preferred with the confidence that these fabrics will contribute to healthy indoor air.
